

# Sticker Metal UHF

The Sticker UHF line offers excellent reading performance on metallic equipment. They have been designed for the industrial, logistics and retail sectors.

For use in extremely harsh environments, a special protective film can be applied with which the sticker becomes resistant to water, dust, abrasions and UV radiation.

Available in many different dimensions.

## FUNCTIONAL SPECIFICATIONS

EAN	8720299511033
Article	UHFMSTICKER01
Type	UHF
RFID Protocol	EPC global and ISO 18000-63 compliant, Gen2v2 compliant
Frequency	Global: 840 ~940 MHz
IC Type	Monza R6P
Memory User	User memory : 32 (64) bits ; EPC memory : 128 (96) bits
Write cycles	100,000 times
Functionalities	Read/write
Data Retention	Up to 50 years
Applicable Surface	On metal

## PHYSICAL SPECIFICATIONS

Cable tie dimensions	Width: 30 mm, height: 15mm, 1.25mm thick (pictured, many dimensions available)
Mounting method	Adhesive (standard or strong)

## ENVIRONMENTAL SPECIFICATIONS

Storage Temperature	-40°C to +85°C
Operating Temperature	-40°C to +85°C

v1.0  
non-contractual document
